

Today we would like to share with you the story of this beautiful, sweet dog.

Her previous owner called her Joey, and she lived in Cosmo City. She, like so many other dogs in Townships, got knocked over by a car. Fortunately she managed to crawl back to her house, even though her one back leg was seriously injured.

Unfortunately, like so many dogs in Townships, her owner only contacted us over a week later, when the flesh already started to rot! She was taken to our vet at Blue Bush Animal Clinic, but Dr Shelagh Hahn, was unable to save her leg.

Her leg was amputated and she is recovering at the Animal Clinic.

Joey is only approximately 7 months old. Her owner made it clear to us that he does not want a three-legged dog back. **Unfortunately her new home didn't work out so she is now in desperate need of a loving home!**

After the amputation of her left leg

Her leg before the amputation
